

Summer School 2026

Where young
minds shine.

M|P|W

Our Summer School offers students more. More knowledge through a high-quality academic programme. More skills for life through innovative classes, and lectures from leading university academics. And more fun, with a packed schedule of social and cultural activities which allows them to experience the very best of British culture.

My Path; My Way

An innovative collection of courses that complement our academic streams.

Beyond the Podium

Breakthrough Thinking

Building Bridges

Mastering the Art of Influence

Mind over Matter

Navigating the Noise

"I think the MPW Summer School helped me choose what I actually want to do at university. I was not really sure about business but this programme helped me a lot, it gave me a much wider understanding of the subject."

Adiya, from Kazakhstan | **Summer School**

"This Summer School is the best thing that could have happened to me. I chose Computing, Robotics and AI. This course not only helped me to get to know myself better, but now I know more about computing, and I know what I want to do in the future. That's what I want to study."

Rugile, from Lithuania | **Summer School**

"One of the trips was visiting Imperial College London, it was really good. We went to a Civil Engineering lecture; the Professor worked on The Shard and the Burj Khalifa. We got to see what it would be like to study in the future in the UK."

Utku, from Turkey | **Summer School**
